**Vortech Systems delivers twenty eight Nautic Air  
in-line air purifiers to Heinen & Hopman  
Engineering for installation on a 50m Heesen  
under construction in Holland.**

In November of 2009 Vortech Systems signed a Distributorship Agreement with Heinen & Hopman (H&H) naming them the official Vortech Systems Service Center in Barcelona, Spain.

H&H is now part of the Vortech Systems Dealer Network that includes Freedom Maritime in Antibes and Larkside Marine in Palma. H&H will now offer the patented Dry Mist Decontamination treatments and all of the Products that Vortech Systems represents. This includes the Nautic Air products.

The Nautic Air units are unlike any other in-line air purification system on the market today. The unparalleled power comes from combining photo catalytic oxidation with polarized media, known as our PolarClear™ technology, resulting in the elimination of 99.7% of harmful airborne contaminants.

The Nautic Air units easily install into the existing HVAC system, allowing you to enjoy clean, pure air throughout your entire yacht. Other Nautic Air Units for the Marine Industry include the NA-20 and NA-30. For more info on the Nautic Air Products visit [www.vortechsys.com/nautic\\_air.html](http://www.vortechsys.com/nautic_air.html)

Vortech Systems is a total solutions provider to all of your Indoor Air Quality issues. They offer complete Mold/Microbial Decontamination Services, Air/Water/Surface sampling, Duct Cleaning, long term Antimicrobial Surface Treatments, Dehumidification solutions, air scrubbing and Sales and Rentals of all products related to treating these IAQ issues.
