

# na20

For clean, pure air in your home or office.

## Ideal for

- Home
- Office
- Hospitals
- Clean rooms
- LEED buildings
- Large marine vessels
- Cruise ships
- Anywhere a centralized air duct is used

The NA20 is unlike any other in-line air purification system on the market today. Its unparalleled power comes from combining photo catalytic oxidation with polarized media, known as our PolarClear™ technology, resulting in the elimination of 99.7% of harmful airborne contaminants.

The NA20 easily installs into the existing HVAC system, allowing you to enjoy clean, pure air throughout your entire

home or office—without having costly and unsightly floor units.

If you'd like to feel healthier and breathe easier, the NA20 is for you.

**Residential and Commercial models available**

**Custom models available upon inspection**

## specifications

### PolarClear™ technology

Effective against dust, pollen, viruses, bacteria, mold, cigarette smoke, odors, and VOCs

Third-party green-certified TiO<sub>2</sub>

UV bulbs with chamber to process air

No ozone or off gassing produced

MERV 14 efficiency=97% efficient at 0.3 microns

Efficiency increases as media fibers load

Patented activated-carbon center screen

Low static pressure drop (WC between 0.5 and 0.1)

### Structure

100% aluminum structure, making it 3 times lighter than units made of galvanized steel

Stainless steel hardware

Rust and wear resistant

Insulated to prevent sweating

Filter banks can be modified to accommodate large tonnage systems or space constraints

### Electrical

Filters run off 24 VAC/Power draw is 3 VA or about 2 watts per filter

120 volts ballasts and transformers

240 volts is available

nautic air®
